

Shell plc

First quarter 2026 results

Integrated portfolio drives strong results

May 7, 2026

Definitions & cautionary note

The companies in which Shell plc directly and indirectly owns investments are separate legal entities. In this presentation “Shell”, “Shell Group” and “Group” are sometimes used for convenience to reference Shell plc and its subsidiaries in general. Likewise, the words “we”, “us” and “our” are also used to refer to Shell plc and its subsidiaries in general or to those who work for them. These terms are also used where no useful purpose is served by identifying the particular entity or entities. “Subsidiaries”, “Shell subsidiaries” and “Shell companies” as used in this presentation refer to entities over which Shell plc either directly or indirectly has control. The terms “joint venture”, “joint operations”, “joint arrangements”, and “associates” may also be used to refer to a commercial arrangement in which Shell has a direct or indirect ownership interest with one or more parties. The term “Shell interest” is used for convenience to indicate the direct and/or indirect ownership interest held by Shell in an entity or unincorporated joint arrangement, after exclusion of all third-party interest.

This presentation contains forward-looking statements (within the meaning of the U.S. Private Securities Litigation Reform Act of 1995) concerning the financial condition, results of operations and businesses of Shell. All statements other than statements of historical fact are, or may be deemed to be, forward-looking statements. Forward-looking statements are statements of future expectations that are based on management’s current expectations and assumptions and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in these statements. Forward-looking statements include, among other things, statements concerning the potential exposure of Shell to market risks and statements expressing management’s expectations, beliefs, estimates, forecasts, projections and assumptions. These forward-looking statements are identified by their use of terms and phrases such as “aim”, “ambition”, “anticipate”, “aspire”, “aspiration”, “believe”, “commit”, “commitment”, “could”, “desire”, “estimate”, “expect”, “goals”, “intend”, “may”, “milestones”, “objectives”, “outlook”, “plan”, “probably”, “project”, “risks”, “schedule”, “seek”, “should”, “target”, “vision”, “will”, “would” and similar terms and phrases. There are a number of factors that could affect the future operations of Shell and could cause those results to differ materially from those expressed in the forward-looking statements included in this presentation, including (without limitation): (a) price fluctuations in crude oil and natural gas; (b) changes in demand for Shell’s products; (c) currency fluctuations; (d) drilling and production results; (e) reserves estimates; (f) loss of market share and industry competition; (g) environmental and physical risks, including climate change; (h) risks associated with the identification of suitable potential acquisition properties and targets, and successful negotiation and completion of such transactions; (i) the risk of doing business in developing countries and countries subject to international sanctions; (j) legislative, judicial, fiscal and regulatory developments including tariffs and regulatory measures addressing climate change; (k) economic and financial market conditions in various countries and regions; (l) political risks, including the risks of expropriation and renegotiation of the terms of contracts with governmental entities, delays or advancements in the approval of projects and delays in the reimbursement for shared costs; (m) risks associated with the impact of pandemics, regional conflicts, such as the Russia-Ukraine war and the conflict in the Middle East, and a significant cyber security, data privacy or IT incident; (n) the pace of the energy transition; and (o) changes in trading conditions. No assurance is provided that future dividend payments will match or exceed previous dividend payments. All forward-looking statements contained in this presentation are expressly qualified in their entirety by the cautionary statements contained or referred to in this section. Readers should not place undue reliance on forward-looking statements. Additional risk factors that may affect future results are contained in Shell plc’s Form 20-F for the year ended December 31, 2025 (available at www.shell.com/investors/news-and-filings/sec-filings.html and www.sec.gov). These risk factors also expressly qualify all forward-looking statements contained in this presentation and should be considered by the reader. Each forward-looking statement speaks only as of the date of this presentation, May 7, 2026. Neither Shell plc nor any of its subsidiaries undertake any obligation to publicly update or revise any forward-looking statement as a result of new information, future events or other information. In light of these risks, results could differ materially from those stated, implied or inferred from the forward-looking statements contained in this presentation.

Also, in this presentation we may refer to Shell’s “net carbon intensity” (NCI), which includes Shell’s carbon emissions from the production of our energy products, our suppliers’ carbon emissions in supplying energy for that production and our customers’ carbon emissions associated with their use of the energy products we sell. Shell’s NCI also includes the emissions associated with the production and use of energy products produced by others which Shell purchases for resale. Shell only controls its own emissions. The use of the terms Shell’s “net carbon intensity” or NCI is for convenience only and not intended to suggest these emissions are those of Shell plc or its subsidiaries.

Shell’s operating plan and outlook are forecasted for a three-year period and ten-year period, respectively, and are updated every year. They reflect the current economic environment and what we can reasonably expect to see over the next three and ten years. Accordingly, the outlook reflects our combined Scope 1 and 2 target, NCI target and our oil products ambition over the next ten years. However, Shell’s operating plan and outlook cannot reflect our 2050 net-zero emissions target, as this target is outside our planning period. Such future operating plans and outlooks could include changes to our portfolio, efficiency improvements and the use of carbon capture and storage and carbon credits. In the future, as society moves towards net-zero emissions, we expect Shell’s operating plans and outlooks to reflect this movement. However, if society is not net zero in 2050, as of today, there would be significant risk that Shell may not meet this target.

This presentation may contain certain forward-looking non-GAAP measures such as free cash flow and underlying operating expenses. We are unable to provide a reconciliation of these forward-looking non-GAAP measures to the most comparable GAAP financial measures because certain information needed to reconcile those non-GAAP measures to the most comparable GAAP financial measures is dependent on future events some of which are outside the control of Shell, such as oil and gas prices, interest rates and exchange rates. Moreover, estimating such GAAP measures with the required precision necessary to provide a meaningful reconciliation is extremely difficult and could not be accomplished without unreasonable effort. Non-GAAP measures in respect of future periods which cannot be reconciled to the most comparable GAAP financial measure are calculated in a manner which is consistent with the accounting policies applied in Shell plc’s consolidated financial statements.

The contents of websites referred to in this presentation do not form part of this presentation.

We may have used certain terms, such as resources, in this presentation that the United States Securities and Exchange Commission (SEC) strictly prohibits us from including in our filings with the SEC. Investors are urged to consider closely the disclosure in our Form 20-F, File No 1-32575, available on the SEC website www.sec.gov.

¹ For next 3 months. Given the securities law requirements that apply to Shell plc in connection with its agreement to acquire ARC Resources Ltd. ("ARC"), it will be necessary to suspend the programme from the time of publication of the ARC shareholder circular until the conclusion of the ARC shareholder meeting. Any buybacks not undertaken due to such suspension will be part of the remaining 2026 programmes (subject to Board approval). ² Updated post proposed ARC Resources acquisition.

Middle East conflict: impact on Shell operations

Exposure centred around Qatar

~20% (~550 kboe/d) of Shell's oil and gas production comes from the Middle East, ~10% Qatar related. Oman assets continue to be operational. Upstream segment production not impacted.

Qatar update

■ Pearl GTL

- 100% Shell, with 140 kboe/d of GTL products split over two processing trains.
- Train Two damaged; repairs expected to take around one year.
- Train One not impacted; will be ready to restart operations as soon as geopolitical developments and the ability to safely export products allow.

■ LNG

- QatarEnergy shut in production on March 2, 2026 across all LNG facilities and subsequently declared force majeure.
- QatarEnergy LNG N(4) not directly impacted; Shell interest 30% (2.4 mtpa equity production).
- Shell has LNG supply contracts from existing QatarEnergy facilities.
- Construction on new facilities in which Shell has an equity interest was temporarily paused but has now resumed.

■ Integrated Gas Q2 outlook

- Oil & gas Production (kboe/d): 580 – 640 (Q1'26: 909)
- Liquefaction (MT): 6.8 – 7.4 (Q1'26: 7.9)

STRATEGIC RATIONALE

Accelerates Shell's strategy

- Sustains material liquids production, extends reserve life, and strengthens Integrated Gas business
- Increases Integrated Gas & Upstream 2030 production CAGR to 4% versus 2025²

Provides new platform for growth

- Increases exposure to Canada's advantaged lower-cost, lower carbon emissions³ Montney basin
- Strengthens portfolio by securing long-duration shale gas and liquids resources

Delivers long-term value creation

- Combination expected to generate double digit returns and bolsters long-term cash flows
- Accretive to free cash flow per share from 2027 onwards, delivering value for decades

¹ Unless otherwise stated, all financials are presented in US dollars. ² Capital Markets Day 2025 aim of 1% CAGR production growth in Upstream and Integrated Gas combined from 2024 to 2030 increases to 3%. ³ Top quartile of Canadian operators. ⁴ 2026 - 2030 average; price-normalised, for price assumptions see presentation 'Shell to acquire ARC Resources'.

Delivering more value, with less emissions

Profitably transitioning towards Net Zero by 2050

>10% nFCF per share growth p.a. through 2030¹

Distributing **40–50%** of CFFO to shareholders through the cycle

\$5–7 billion structural cost reductions by end 2028²

Cash capex **\$20–22 billion** p.a. 2027–2028; **2026: \$24–26 billion**³

Halve Scope 1 and 2 emissions under operational control by 2030, on a net basis⁴

Achieve near-zero methane emissions intensity by 2030⁵

Reduce the net carbon intensity (NCI) of the products we sell by **15–20% by 2030**⁴

Ambition to reduce customer emissions from the use of our oil products by **15–20% by 2030**⁶

¹ 2024 to 2030, price-normalised (refer to CMD25 materials for price assumptions). ² Cumulative from 2022 levels. ³ Updated post proposed ARC Resources acquisition. ⁴ 2016 reference year. ⁵ On an intensity basis. ⁶ Compared with 2021.
