

Q2 2026 RESULTS

Press Release

London, July 30, 2026

Shell plc Chief Executive Officer, Wael Sawan

"Shell's operational performance enabled very strong results during another quarter of severe disruption in global energy markets, as we worked hard to provide critical energy supplies and products to our customers.

Consistent with our strategy, we remain disciplined in our capital allocation, divesting non-core assets and investing in higher-quality growth opportunities, including the announced ARC acquisition.

Today, we commence another \$3 billion of share buybacks¹, in line with our 40-50% of CFFO through the cycle distribution policy."

OPERATIONAL PERFORMANCE DRIVES VERY STRONG RESULTS

- Q2 2026 Adjusted Earnings² of \$9.8 billion, reflects strong operational performance across the businesses despite Middle East outages, with record upstream production in Brazil and record refinery utilisation.
- Strong CFFO of \$21.4 billion, supported by higher realised prices and a working capital inflow of \$3.4 billion.
- Distributed 44% of CFFO over the past 12 months. 19th quarter in a row of announcing at least \$3 billion buybacks.
- Structural cost reductions of \$5.8 billion achieved since 2022; delivered ~\$700 million in first half of 2026.
- Strong balance sheet with gearing of 19%, reflecting net debt of \$42 billion or \$12 billion excluding leases. Capex outlook for 2026 unchanged: \$24 - 26 billion.
- Portfolio high-grading with the sale of Jiffy Lube (USA) and the announced divestments of SPRNG Energy (India), the Marketing business in South Africa and the Gulf of America Na Kika end-of-life assets.
- ARC Resources acquisition obtained shareholder approval, completion expected in Q3 2026 increasing production growth to 4% CAGR to 2030 (from 2025).

ALTERNATIVE PERFORMANCE (NON-GAAP) MEASURES

This announcement includes certain measures that are calculated and presented on the basis of methodologies other than in accordance with generally accepted accounting principles (GAAP) such as IFRS, including Adjusted Earnings, Adjusted EBITDA, CFFO excluding working capital movements, Cash capital expenditure, free cash flow, Divestment proceeds and Net debt. This information, along with comparable GAAP measures, is useful to investors because it provides a basis for measuring Shell plc's operating performance and ability to retire debt and invest in new business opportunities. Shell plc's management uses these financial measures, along with the most directly comparable GAAP financial measures, in evaluating the business performance.

This announcement may contain certain forward-looking non-GAAP measures such as free cash flow and underlying operating expenses. We are unable to provide a reconciliation of these forward-looking non-GAAP measures to the most comparable GAAP financial measures because certain information needed to reconcile the non-GAAP measures to the most comparable GAAP financial measures is dependent on future events some of which are outside the control of the company, such as oil and gas prices, interest rates and exchange rates. Moreover, estimating such GAAP measures with the required precision necessary to provide a meaningful reconciliation is extremely difficult and could not be accomplished without unreasonable effort. Non-GAAP measures in respect of future periods which cannot be reconciled to the most comparable GAAP financial measure are estimated in a manner which is consistent with the accounting policies applied in Shell plc's consolidated financial statements.
