

SHELL PLC

SECOND QUARTER 2026 RESULTS

Wael Sawan, Chief Executive Officer of Shell PLC

Welcome everyone, and thank you for joining. Today, Sinead and I will present Shell's second quarter 2026 results.

In Q2, Shell delivered very strong results driven by strong operational performance across our businesses. That performance reflects our relentless focus on execution, which enabled us to provide the critical energy our customers needed when it mattered.

In Integrated Gas, strong performance across our global portfolio helped to offset some of the lost LNG volumes from Qatar. Take our LNG Canada Joint Venture for example. This is a greenfield project that shipped its first cargo just a year ago, and it has already delivered more than 100 cargoes and achieved full capacity this quarter.

In Upstream, our continued focus on performance also unlocked additional production this quarter. We continue to optimise and deliver turnarounds ahead of schedule, enabling performance such as in Brazil, where we delivered another quarter of record production.

Our Pennsylvania Petrochemicals Complex also delivered its best performance to date, and our refineries achieved a record 102 per cent utilisation in a high-margin period. Our refineries have responded to what the market needs, shifting production towards middle distillates – like jet fuel – capturing more value from our assets.

These kinds of value-based decisions make a difference at a time when global energy flows are under pressure. And behind them sits an important structural strength: Shell's integrated model. The connectivity across our value chains creates the opportunities to optimise assets, product flows and market exposures from well to wheel.

And as we remained responsive to the fast-changing conditions, we also have kept a clear focus on delivering our strategy and commitments. Structural cost reductions are progressing well, with 700 million dollars delivered so far in 2026. Savings that are driven by changing the way we work across our organisation, including operational efficiencies and a leaner, fit-for-purpose corporate centre, and the high-grading of our portfolio has now delivered savings of close to 6 billion dollars since 2022.

We also continue to access long-term growth and strengthen our portfolio. Our acquisition of ARC Resources has won overwhelming support from ARC's shareholders –

and we're now awaiting final regulatory approval. The ARC deal accelerates our strategy by sustaining material liquids production and growing our Integrated Gas business, lifting our expected production growth to 2030, from around 1 per cent a year to some 4 per cent, compared with 2025.

We have also signed contracts to operate the offshore Loran gas field in Venezuela, and in Namibia we continued to create optionality having drilled our most promising exploration well to date. At the same time, in Upstream, we have agreed to sell our non-operated working interest in Na Kika in the Gulf of America – an asset that secured attractive value, as it nears the end of its life.

Taken together, this is high-grading in action: releasing value from assets where we are no longer the natural owner and reinvesting it in the next generation of competitively positioned supply.

We also recently announced the divestment of Sprng Energy in India, high-grading our power portfolio. And in Marketing, we completed the divestment of the US Jiffy Lube network and announced the divestment of our South African mobility sites as part of repositioning the portfolio around our key markets.

So, while performing through today's volatility, we maintained discipline and kept up the momentum on our strategic delivery.

And with that, let me hand over to Sinead, who will provide more details on our Q2 financial performance.

[SINEAD GORMAN, CHIEF FINANCIAL OFFICER OF SHELL PLC](#)

Thank you Wael.

In Q2 we delivered a very strong set of results. Adjusted Earnings for the quarter were 9.8 billion dollars, and we generated over 21 billion dollars of cash flow from operations, despite the ongoing disruptions in the Middle East.

Strong operational performance across our segments provided the foundation for our delivery this quarter. In addition to this, LNG trading and optimisation was able to capture significant additional value compared with last quarter.

And I was especially pleased to see the Chemicals results this quarter with a positive free cash flow contribution. The hard work the team is putting into the transformation is starting to pay off and combined with a more favourable margin environment this quarter's results represents the best we have seen in over 5 years. But there is much more to do.

Now, turning to our financial framework. Our cash capex outlook of 24 to 26 billion dollars for 2026 is unchanged. This includes some 4 billion dollars for the ARC Resources acquisition and associated cash capex.

In Q2 we reduced net debt to some 42 billion dollars, or 12 billion dollars excluding leases. And today, we have announced 3 billion dollars of share buybacks, which we expect to complete by our Q3 results announcement in October.

In addition to this new programme, we will also complete the portion of the previous buyback programme that was halted due to regulatory restrictions associated with the ARC transaction.

In summary, this quarter we performed extremely well despite continued disruptions, we made significant progress across the portfolio and we further strengthened our balance sheet, whilst remaining focused on growing long-term value.

And with that, let me hand back to Wael to close.

Wael Sawan, Chief Executive Officer of Shell PLC

Thanks Sinead.

This was a very strong set of results. The macro was supportive – but what these results show more than anything is that Shell delivers through volatility.

We continue to drive performance, discipline and simplification throughout the organisation, as we deliver more value with less emissions. And we are confidently progressing our strategy at pace, as we continue to build a more focused, more resilient and higher-return company.

Thank you.

DEFINITIONS AND CAUTIONARY NOTE

The companies in which Shell plc directly and indirectly owns investments are separate legal entities. In this presentation “Shell”, “Shell Group” and “Group” are sometimes used for convenience to reference Shell plc and its subsidiaries in general. Likewise, the words “we”, “us” and “our” are also used to refer to Shell plc and its subsidiaries in general or to those who work for them. These terms are also used where no useful purpose is served by identifying the particular entity or entities. “Subsidiaries”, “Shell subsidiaries” and “Shell companies” as used in this presentation refer to entities over which Shell plc either directly or indirectly has control. The terms “joint venture”, “joint operations”, “joint arrangements”, and “associates” may also be used to refer to a commercial arrangement in which Shell has a direct or indirect ownership interest with one or more parties. The term “Shell interest” is used for convenience to indicate the direct and/or indirect ownership interest held by Shell in an entity or unincorporated joint arrangement, after exclusion of all third-party interest.

This presentation contains forward-looking statements (within the meaning of the U.S. Private Securities Litigation Reform Act of 1995) concerning the financial condition, results of operations and businesses of Shell. All statements other than statements of historical fact are, or may be deemed to be, forward-looking statements. Forward-looking statements are statements of future expectations that are based on management’s current expectations and assumptions and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in these statements. Forward-looking statements include, among other things, statements concerning the potential exposure of Shell to market risks and statements expressing management’s expectations, beliefs, estimates, forecasts, projections and assumptions. These forward-looking statements are identified by their use of terms and phrases such as “aim”; “ambition”; “anticipate”; “aspire”; “aspiration”; “believe”; “commit”; “commitment”; “could”; “desire”; “estimate”; “expect”; “goals”; “intend”; “may”; “milestones”; “objectives”; “outlook”; “plan”; “probably”; “project”; “risks”; “schedule”; “seek”; “should”; “target”; “vision”; “will”; “would” and similar terms and phrases. There are a number of factors that could affect the future operations of Shell and could cause those results to differ materially from those expressed in the forward-looking statements included in this presentation, including (without limitation): (a) price fluctuations in crude oil and natural gas; (b) changes in demand for Shell’s products; (c) currency fluctuations; (d) drilling and production results; (e) reserves estimates; (f) loss of market share and industry competition; (g) environmental and physical risks, including climate change; (h) risks associated with the identification of suitable potential acquisition properties and targets, and successful negotiation and completion of such transactions; (i) the risk of doing business in developing countries and countries subject to international sanctions; (j) legislative, judicial, fiscal and regulatory developments including tariffs and regulatory measures addressing climate change; (k) economic and financial market conditions in various countries and regions; (l) political risks, including the risks of expropriation and renegotiation of the terms of contracts with governmental entities, delays or advancements in the approval of projects and delays in the reimbursement for shared costs; (m) risks associated with the impact of pandemics, regional conflicts, such as the Russia-Ukraine war and the conflict in the Middle East, and a significant cyber security, data privacy or IT incident; (n) the pace of the energy transition; and (o) changes in trading conditions. No assurance is provided that future dividend payments will match or exceed previous dividend payments. All forward-looking statements contained in this presentation are expressly qualified in their entirety by the cautionary statements contained or referred to in this section. Readers should not place undue reliance on forward-looking statements. Additional risk factors that may affect future results are contained in Shell plc’s Form 20-F for the year ended December 31, 2025 (available at www.shell.com/investors/news-and-filings/sec-filings.html and www.sec.gov). These risk factors also expressly qualify all forward-looking statements contained in this presentation and should be considered by the reader. Each forward-looking statement speaks only as of the date of this presentation, July 30, 2026. Neither Shell plc nor any of its subsidiaries undertake any obligation to publicly update or revise any forward-looking statement as a result of new information, future events or other information. In light of these risks, results could differ materially from those stated, implied or inferred from the forward-looking statements contained in this presentation.

Also, in this presentation we may refer to Shell’s “net carbon intensity” (NCI), which includes Shell’s carbon emissions from the production of our energy products, our suppliers’ carbon emissions in supplying energy for that production and our customers’ carbon emissions associated with their use of the energy products we sell. Shell’s NCI also includes the emissions associated with the production and use of energy products produced by others which Shell purchases for resale. Shell only controls its own emissions. The use of the terms Shell’s “net carbon intensity” or NCI is for convenience only and not intended to suggest these emissions are those of Shell plc or its subsidiaries.

Shell’s operating plan and outlook are forecasted for a three-year period and ten-year period, respectively, and are updated every year. They reflect the current economic environment and what we can reasonably expect to see over the next three and ten years. Accordingly, the outlook reflects our combined Scope 1 and 2 target, NCI target and our oil products ambition over the next ten years. However, Shell’s operating plan and outlook cannot reflect our 2050 net-zero emissions target, as this target is outside our planning period. Such future operating plans and outlooks could include changes to our portfolio, efficiency improvements and the use of carbon capture and storage and carbon credits. In the future, as society moves towards net-zero emissions, we expect Shell’s operating plans and outlooks to reflect this movement. However, if society is not net zero in 2050, as of today, there would be significant risk that Shell may not meet this target.

This presentation may contain certain forward-looking non-GAAP measures such as free cash flow and underlying operating expenses. We are unable to provide a reconciliation of these forward-looking non-GAAP measures to the most comparable GAAP financial measures because certain information needed to reconcile those non-GAAP measures to the most comparable GAAP financial measures is dependent on future events some of which are outside the control of Shell, such as oil and gas prices, interest rates and exchange rates. Moreover, estimating such GAAP measures with the required precision necessary to provide a meaningful reconciliation is extremely difficult and could not be accomplished without unreasonable effort. Non-GAAP measures in respect of future periods which cannot be reconciled to the most comparable GAAP financial measure are calculated in a manner which is consistent with the accounting policies applied in Shell plc’s consolidated financial statements.

The contents of websites referred to in this presentation do not form part of this presentation.

We may have used certain terms, such as resources, in this presentation that the United States Securities and Exchange Commission (SEC) strictly prohibits us from including in our filings with the SEC. Investors are urged to consider closely the disclosure in our Form 20-F, File No 1-32575, available on the SEC website www.sec.gov.
